Policy of Green Campus

Green campus initiatives include:

The institutional initiatives for making the campus green are as follows:

- Vehicle entry restrictions.
- Use of bicycles and battery-powered vehicles.
- Pedestrian-friendly pathways and a ban on the usage of plastic.
- Using plants and trees for landscaping

Use of Bicycles/Battery Powered Vehicles

Bicycles are used by students from neighbouring communities to travel to the college. They are urged to utilise bicycles as much as possible to minimise fuel consumption and pollution and improve the environment on campus. This initiative reduces pollution and is environmentally friendly. Many students commute from urban areas and frequently drive the increasingly common battery-powered vehicles. Private battery-powered rickshaws used by students are commonly spotted close to the university.

- **Pedestrian Friendly pathways**
For staff and students to move securely and freely throughout the college campus, pedestrian-friendly pathways have been created.
- **Ban on use of Plastic**
To stop the use of plastic, it is absolutely prohibited to use products made of plastic, including cups, utensils, bottles, and bags. Staff members and students are also involved in awareness campaigns. Students and staff are reminded to avoid using plastic water bottles and to use steel or copper containers instead. It made it easier to keep pollution and plastic from contaminating the campus.
